Subject index

A

Abutment crown for existing removable partial denture, replacing (Garfield), 103
Accuracy and dimensional stablity of four interocclusal recording materials (Balthazar-Hart et al), 586
Acrylic resin, processed, and trial bases, validity of maxillomandibular records made with (Langer), 253
  temporary fixed prosthesis for allergic patient, fabricating (Antonoff and Levine), 678
Adhesion of polycarboxylate cement to enamel and dentin, factors affecting (Negm et al), 405
Adjustment of cast clasps for direct retention (Stankewitz and Gardner) (Tips), 343
  removable partial denture frameworks, comparison of disclosing media used for (Dukes and Fields), 380
Adult palatal expansion prostheses (Brudvik and Nelson), 315
Aging human gingiva, changes in nerve supply to (Nedelman and Bernick), 364
Air spray, continuous, to mouth mirror for increased visibility, (Re and Miller) (Tips), 343
Alar collapse, treatment of, with nasal prostheses (Davenport et al), 435
Allergic patient, fabricating acrylic resin temporary fixed prosthesis for (Antonoff and Levine), 678
Alloy, copper-zinc, SEM and x-ray microanalysis of in vitro corrosion of (Sarkar), 292
Alumina crowns, bonded, strengthenig mechanism of (Sarkar and Jeansonne), 95
Alveolar process, mandibular anterior lingual, form of, in partially edentulous patients (Pietrokovski and Chapman), 371
Amalgam(s) and composite resin cores, retention of cast crowns cemented to (Hormati and Denehy), 525
  dental, in vitro tarnish of (Vaidyanathan et al), 63
American Academy of Restorative Dentistry, Report of Committee on Scientific Investigation of (Jendresen et al), 643
Anatomy, radiologic, of patients who gag with dentures (Wright), 127
Anterior guidance, semiadjustable instrumentation based on (Loos), 521
  lingual alveolar process mandibular, in partially edentulous patients, form of (Pietrokovski and Chapman), 371
  tooth visibility, Part I: Margin placement of esthetic veneer crowns (Crispin and Watson), 278
Arch prosthesis, unilateral maxillary, hinge for (Lopuck et al), 446
Articulated jaw records of 150 edentulous patients, study of. Evaluation of cross-bite ridge relations (Sanghvi et al), 24
Artificial teeth, easy method of trimming (Khan) (Tips), 572

B

Bases, trial denture, accurately fitting (Berman) (Tips), 573
  and processed acrylic resin, validity of maxillomandibular records made with (Langer), 253

January, 1-118; February, 119-238; March, 239-354; April, 355-466; May, 467-582; June, 583-704.

Bonded alumina crowns, strengthening mechanism of (Sarkar and Jeansonne), 95
Boxing impressions, method of (Powter and Hope), 224
Bruxism, diurnal and nocturnal, incidence of (Glaros), 545

C

Candida, role of, in inflammatory papillary hyperplasia (Monaco and Pickett), 470
Cartilage, condylar: Scanning electron microscope study of anorganic mammalian condyles (Lester et al), 422
Cast, altered, technique for mounting, using initial anatomic plaster records (Haller et al) (Tips), 681
clasps for direct retention, adjustment of (Stankewitz and Gardner) (Tips), 343
fixed partial denture remount, fabrication of (Tregaskes et al), 334
Casting machines, centrifugal, inner surface roughness of complete cast crowns made by (Ogura et al), 529
misfit: How to cope (Eames), 283
removable partial denture frameworks, comparative study of centrifugal and vacuum-pressure techniques of (Shanley et al), 18
Cement(s) keys, auxiliary retention for complete crowns provided by (Chan et al), 152
luting, continued evaluation of clinical solubility of (Mitchem and Gronas), 289
polycarboxylate, factors affecting adhesion of, to enamel and dentin (Negm et al), 405
Cemented crowns, effect of internal relief, vibration, and venting on vertical seating of (Van Nortwick and Gettleman), 395
influence of some factors on fit of (Ishikiriama et al), 400
Centric occlusion, intercuspal contacts of natural dentition in (Ehrlich and Taicher), 419
Centrifugal and vacuum-pressure techniques of casting removable partial denture frameworks, comparative study of (Shanley et al), 18
Ceramometal fixed partial dentures, distortion of, during firing cycle (Bridger and Nicholls), 507
restorations, use of silicone index to apply and contour porcelain on occlusal surfaces of (Lubovich and Sanders), 392
systems, two, effect of repeated firings and strength on marginal distortion in (Buchanan et al), 502
Chew-in records, functional, for fixed restorations (Levisman), 676
Clasp(s) arms, retentive, preliminary study of wear of porcelain when subjected to functional movements of (Maroso et al), 14
cast, for direct retention, adjustment of (Stankewitz and Gardner) (Tips), 343
wrought wire, study of flexibility of (Frank and Nicholls), 259
Cleansers, denture, and denture plaque (Abelson), 376
Clinical solubility of luting cements, continued evaluation of (Mitchem and Gronas), 289
Complete crowns, auxiliary retention for, provided by cement keys (Chan et al), 152
denture, lower, hollow (Holt), 452
reline: Simplified technique (McCartney), 564
Composite resin(s) and amalgam cores, retention of cast crowns cemented to (Hormati and Denehy), 525
restorations, effectiveness of glazing (Itoh et al), 606
various, diametral tensile strengths of (Coury et al), 296
Computer-monitored radionuclide tracking of three-dimensional mandibular movements. Part III: Multiple point sources—Toward mapping of tooth contacts (Salomon et al), 324
(Condensation) silicones, Part I: Time-dependent accuracy of elastomer impression materials (Lacy et al), 209
Condyles, anorganic mammalian, scanning electron microscope study of: Condylar cartilage (Lester et al), 422
Condylar cartilage: Scanning electron microscope study of anorganic mammalian condyles (Lester et al), 422
Contour(s), crown, margin placement, and pontic design, current theories of (Becker and Kaldahl), 268
natural, of teeth in metal, reproducing (Lazare), 341
Contra-angle dental handpiece, seating depths of three new threaded pins inserted with (Schaefer and Reisbick), 614
Cope, how to: Casting misfit (Eames), 283
Coping technique, intraoral, for making impressions of multiple preparations (Gardner and Loft), 570
Copper-zinc alloy, SEM and x-ray microanalysis of in vitro corrosion of (Sarkar), 292
Cores, amalgam and composite resin, retention of cast crowns cemented to (Hormati and Denehy), 525
Corrosion, in vitro, of copper-zinc alloy, SEM and x-ray microanalysis of (Sarkar), 292
Cross-bite ridge relations, evaluation of. Study of articulated jaw records of 150 edentulous patients (Sanghvi et al), 24
Crown(s), abutment, replacing, for existing partial denture (Garfield), 103
cast, retention of, cemented to amalgam and composite resin cores (Hormati and Denehy), 525
cemented, effect of internal relief, vibration, and venting on vertical seating of (Van Nortwick and Gettleman), 395
influence of some factors on fit of (Ishikiriama et al), 400
complete, auxiliary retention for, provided by cement keys (Chan et al), 152
cast, inner surface roughness of, made by centrifugal casting machines (Ogura et al), 529
contour, margin placement, and pontic design, current theories of (Becker and Kaldahl), 268
esthetic veneer, margin placement of. Part I: Anterior tooth visibility (Crispin and Watson), 278
Part II: Posterior tooth visibility (Crispin and Watson), 389
Part III: Attitudes of patients and dentists (Watson and Crispin), 499
and fixed partial denture remount cast, fabrication of (Tregaskes et al), 334
fractured porcelain jacket, repair of, with composite resin (Rehany et al), 455
full, preparations, effect of various finish line preparations on marginal seal and occlusal seat of (Gavelis et al), 138
lengthening, clinical, by vertical root movement (Shiloah), 602
Customized incisal guide table, fabricating (Kaiser), 568

D

Decibel ratings of dental office sounds (Kilpatrick), 175
Defects, maxillary, maximizing support for (Vergo and Chapman), 179
surgically acquired, evaluation of speech following prosthetic obturation of (Plank et al), 626
septal, simplified method of treating (Gay), 430
Dental amalgams, in vitro tarnish of (Vaidyanathan et al), 63
office sounds, decibel ratings of (Kilpatrick), 175
radiographs, mounting, for projection or chairside viewing (Tebrock), 456
Dentin and enamel, factors affecting adhesion of polycarboxylate cement to (Negm et al), 405
Dentistry, reconstructive, evaluation of 50 years of. Part I: Jaw relations and occlusion (Schweitzer), 383
Part II: Effectiveness (Schweitzer), 492
restorative, potential for tooth fracture in (Braly and Maxwell), 411

Dentition, natural, in centric occlusion, intercuspal contacts of (Ehrlich and Taicher), 419
extracted, immediate fixed temporization utilizing (Portera), 286
Denture(s) bases, trial, accurately fitting (Berman) (Tips), 573
ceramometal fixed partial, distortion of, during firing cycle (Bridger and Nicholls), 507
cleansers and denture plaque (Abelson), 376
complete, reline: Simplified technique (McCartney), 564
fixed partial, partially loosened, removal of (Hall and Connor), 221
remount cast, fabrication of (Tregaskes et al), 334
frameworks, removable partial, comparative study of centrifugal and vacuum-pressure techniques of casting (Shanley et al), 18
swinglock removable partial, fabrication of (Schwalm and LaSpina), 216
hollow complete lower (Holt), 452
immediate, effect of, on maxillomandibular relations (Passamonti et al), 122
maxillary complete, techniques for remounting removable partial dentures opposing (Lauciello), 336
medical history, social habits, and individual experiences of patients who gag with (Wright), 474
plaque and denture cleansers (Abelson), 376
radiologic anatomy of patients who gag with (Wright), 127
removable partial, existing, replacing abutment crown for (Garfield), 103
frameworks, comparison of disclosing media used for adjustment of (Dukes and Fields), 380
opposing maxillary complete dentures, technique for remounting (Lauciello), 336
telescope retainers for (Langer) 37
swinglock removable partial: Where and when (Bolender and Becker), 4
technique, patient response to variations in: Part IV: Microscopic response of oral mucosa (Sabes et al), 11
Design, pontic, crown contour, and margin placement, current theories of (Becker and Kaldahl), 268
Diametral tensile strengths of various composite resins (Coury et al), 296
Dies, epoxy resin and stone, linear dimensional accuracy of (Schwartz et al), 621
Diet of institutionalized elderly people in Finland, milk and vegetables in (Mäkilä), 134
Dimension, increased occlusal vertical, in adult monkeys (Ramfjord and Blankenship), 74
vertical: Study of clinical rest position and jaw muscle activity (Rugh and Drago), 670
Dimensional accuracy, linear, of epoxy resin and stone dies (Schwartz et al), 621
stability and accuracy of four interocclusal recording materials (Balthazar-Hart et al), 586
Disclosing media used for adjustment of removable partial denture frameworks, comparison of (Dukes and Fields), 380
Distortion of ceramometal fixed partial dentures during firing cycle (Bridger and Nicholls), 507
marginal, in two ceramometal systems, effect of repeated firings and strength on (Buchanan et al), 502
seal, posterior peripheral, related to processing temperature (Firtell et al), 598
Dysfunction, pain-, syndrome, myofascial, transcutaneous electrical stimulation as adjunct in management of (Wessberg et al), 307

E

Edentulous patients, 150, study of articulated jaw records of. Evaluation of cross-bite ridge relations (Sanghvi et al), 24
Edentulous patients—*cont'd*
partially, form of mandibular anterior lingual alveolar process in (Pietrokovski and Chapman), 371
Elastomer impression materials, time-dependent accuracy of. Part I: (Condensation) silicones (Lacy et al), 209
Part II: Polyether, polysulfides, and polyvinylsiloxane (Lacy et al), 329
Elastomeric impression materials used in fixed prosthodontics, comparison of (Ciesco et al), 89
Electrical activity of postural muscles of mandible, changes in, upon varying vertical dimension (Manns et al), 438
stimulation, transcutaneous, as adjunct in management of myofascial pain-dysfunction syndrome (Wessberg et al), 307
Electrodeposits and impression materials. Part I: Impression materials (Stackhouse), 44
Part II: Electrodeposits (Stackhouse), 146
Enamel and dentin, factors affecting adhesion of polycarboxylate cement to (Negm et al), 405
Endodontically treated molar with root fracture, restoration of (Thayer), 415
Endodontic-prosthodontic approach to internal tooth reinforcement (Sapone and Lorencki), 164
Endosseous implant, method of obtaining epithelial attachment on (May and Shapiro), 556
Epithelial attachment, method of obtaining, on endosseous implant (May and Shapiro), 556
Epoxy resin and stone dies, linear dimensional accuracy of (Schwartz et al), 621
Equilibrium point, physiologic, of mandible, method for determining (Tradowsky and Kubicek), 558
Expansion prostheses, adult palatal (Brudvik and Nelson), 315

F

Facial moulage, sectional, fabricating moisture chamber spectacles with (Tautin et al), 183
pain, associated, and occlusal pathosis, etiology and treatment of (Okeson), 199
Finish line preparations, various, effect of, on marginal seal and occlusal seat of full crown preparations (Gavelis et al), 138
Finland, milk and vegetables in diet of institutionalized elderly people in (Mäkilä), 134
Firing(s) cycle, distortion of ceramometal fixed partial dentures during (Bridger and Nicholls), 507
repeated, and strength, effect of, on marginal distortion in two ceramometal systems (Buchanan et al), 502
Fit of cemented crowns, influence of some factors on, (Ishikiriama et al), 400
Fixed partial denture(s), partially loosened, removal of (Hall and Connor), 221
remount cast and crown, fabrication of (Tregaskes et al), 334
prosthodontics, comparison of elastomeric impression materials used in (Ciesco et al), 89
temporization, immediate, utilizing extracted natural dentition (Portera), 286
Flange design, lingual, current concepts of (Levin), 242
Flexibility of wrought wire clasps, study of (Frank and Nicholls), 259
Fluoride, effect of topical application of, on composite resin restorations (Yaffe and Zalkind), 59
Form of mandibular anterior lingual alveolar process in partially edentulous patients, (Pietrokovski and Chapman), 371
Fracture load in vitro, Part II: Temporary space maintainers retained with composite resin (Grajower et al), 49
root, restoration of endodontically treated molar with (Thayer), 415
tooth, in restorative dentistry, potential for (Braly and Maxwell), 411

Fractured porcelain jacket crowns, repair of, with composite resin (Rehany et al), 455
Framework(s), removable partial denture, comparative study of centrifugal and vacuum-pressure techniques of casting (Shanley et al), 18
comparison of disclosing media used for adjustment of (Dukes and Fields), 380
swinglock removable partial denture, fabrication of (Schwalm and LaSpina), 216
Full crown preparations, effect of various finish line preparations on marginal seal and occlusal seat of (Gavelis et al), 138
Functional movements of retentive clasp arms, preliminary study of wear of porcelain when subjected to (Maroso et al), 14

G

Gag, medical history, social habits, and individual experiences of patients with dentures who (Wright), 474
radiologic anatomy of patients with dentures who, (Wright), 127
Gingiva, aging human, changes in nerve supply to (Nedelman and Bernick), 364
Glazing composite resin restorations, effectiveness of (Itoh et al), 606
Grinding, selective, chairside analysis of feasibility of (Rosner), 30

H

Handpiece, contra-angle dental, seating depths of three new threaded pins inserted with (Schaefer and Reisbick), 614
Hawley occlusal splint, modified (Rehany and Stern), 536
Hinge for unilateral maxillary arch prosthesis (Lopuck et al), 446
Hollow-bulb maxillary obturator, repair of (Medford), 111
Hollow complete lower denture (Holt), 452
Hyperplasia, inflammatory papillary, role of *Candida* in (Monaco and Pickett), 470

I

Immediate dentures, effect of, on maxillomandibular relations (Passamonti et al), 122
Implant(s), custom-fabricated silicone rubber, for tissue augmentation—Review (Raval and Schaaf), 432
endosseous, method of obtaining epithelial attachment on (May and Shapiro), 556
perforated silicone rubber, fabrication of (Raval et al), 449
Impression(s), edentulous obturator, open-face custom tray for (Zaki and Aramany), 639
materials, elastomer, time-dependent accuracy of. Part I: (Condensation) silicones (Lacy et al), 209
Part II: Polyether, polysulfides, and polyvinylsiloxane (Lacy et al), 329
elastomeric, used in fixed prosthodontics, comparison of (Ciesco et al), 89
and electrodeposits. Part I: Impression materials (Stackhouse), 44
Part II: Electrodeposits (Stackhouse), 146
method of boxing (Powter and Hope), 224
of multiple preparations, intraoral coping technique for making (Gardner and Loft), 570
Incisal guide table, customized, fabricating (Kaiser), 568
Incisive papilla and nasal width as guides for selection and arrangement of maxillary anterior teeth (Mavroskoufis and Ritchie), 592
Instrumentation, semiadjustable, based on "anterior" guidance (Loos), 521
Intercuspal contacts of natural dentition in centric occlusion (Ehrlich and Taicher), 419
Interim prosthesis, surgical (Frame and King), 108
Internal relief, vibration, and venting, effect of, on vertical seating of cemented crowns, (Van Nortwick and Gettleman), 395
Interocclusal recording materials, four, accuracy and dimensional stability of (Balthazar-Hart et al), 586
Intraoral coping technique for making impressions of multiple preparations (Gardner and Loft), 570

J

Jaw muscle activity and clinical rest position, study of: Vertical dimension (Rugh and Drago), 670
records, articulated, of 150 edentulous patients, study of. Evaluation of cross-bite ridge relations (Sanghvi et al), 24
relations and occlusion, Part I: Evaluation of 50 years of reconstructive dentistry (Schweitzer), 383

K

Keys, cement, auxiliary retention for complete crowns provided by (Chan et al), 152
Kinesiology, applied—Double-blind pilot study (Friedman and Weisberg), 321

L

Leakage, marginal: Entry side and exit side–clinical implications (Hormati et al), 52
evaluation of two methods for assessing (Crim and Mattingly), 160
Lingual alveolar process, mandibular anterior, form of, in partially edentulous patients (Pietrokovski and Chapman), 371
flange design, current concepts of (Levin), 242
Load, fracture, in vitro, Part II: Temporary space maintainers retained with composite resin (Grajower et al), 49
Luting cements, continued evaluation of clinical solubility of (Mitchem and Gronas), 289

M

Magnetic retention for complete and partial overdentures. Part I (Gillings), 484
Maintainers, space, temporary, retained with composite resin. Part II: Fracture load in vitro (Grajower et al), 49
Mandible, changes in electrical activity of postural muscles of, upon varying vertical dimension (Manns et al), 438
method for determining physiologic equilibium point of (Tradowsky and Kubicek), 558
Mandibular anterior lingual alveolar process in partially edentulous patients, form of (Pietrokovski and Chapman), 371
movements, three-dimensional, computer-monitored radionuclide tracking of. Part III: Multiple point sources—Toward mapping of tooth contacts (Salomon et al), 324
Margin placement, crown contour, and pontic design, current theories of (Becker and Kaldahl), 268
of esthetic veneer crowns. Part I: Anterior tooth visibility (Crispin and Watson), 278
Part II: Posterior tooth visibility (Crispin and Watson), 389
Part III: Attitudes of patients and dentists (Watson and Crispin), 499
Marginal distortion, effect of repeated firings and strength on, in two ceramometal systems (Buchanan et al), 502
leakage: Entry side and exit side–clinical implications (Hormati et al), 52
evaluation of two methods for assessing (Crim and Mattingly), 160
seal and occlusal seat of full crown preparations, effect of various finish line preparations on (Gavelis et al), 138

Maxillary anterior teeth, nasal width and incisive papilla as guides for selection and arrangement of (Mavroskoufis and Ritchie), 592
arch prosthesis, unilateral, hinge for (Lopuck et al), 446
complete dentures, technique for remounting removable partial dentures opposing (Lauciello), 336
defects, maximizing support for (Vergo and Chapman), 179
surgically acquired, evaluation of speech following prosthetic obturation of (Plank et al), 626
obturator, hollow-blub, repair of (Medford), 111
Maxillofacial pain, chronic, diagnosis of (Alling), 300
Maxillomandibular records made with trial and processed acrylic resin bases, validity of (Langer), 253
relations, effect of immediate dentures on (Passamonti et al), 122
Medical history, social habits, and individual experiences of patients who gag with dentures (Wright), 474
Metal, reproducing natural contours of teeth in (Lazare), 341
Microanalysis, SEM and x-ray, of in vitro corrosion of copper-zinc alloy (Sarkar), 292
Microscope study, scanning electron, of anorganic mammalian condyles: Condylar cartilage (Lester et al), 422
Microscopic response of oral mucosa, Part IV: Patient response to variations in denture technique (Sabes et al), 11
Milk and vegetables in diet of institutionalized elderly people in Finland (Mäkilä), 134
Mirror, mouth, for increased visibility, continuous air spray to (Re and Miller) (Tips), 343
Misfit, casting: How to cope (Eames), 283
Models in dentistry (Re) (Tips), 680
Moisture chamber spectacles, fabricating, with sectional facial moulage (Tautin et al), 183
Molar, endodontically treated, with root fracture, restoration of (Thayer), 415
Monkeys, adult, increased occlusal vertical dimension in (Ramfjord and Blankenship), 74
Moulage, sectional facial, fabricating moisture chamber spectacles with (Tautin et al), 183
Mounting altered cast using initial anatomic plaster records, technique for (Haller et al) (Tips), 681
MPD syndrome patients and non-MPD syndrome patients, stress-pain relationship in (Moody et al), 84
Muscle(s) activity, jaw, and clinical rest position, study of: Vertical dimension (Rugh and Drago), 670
postural, of mandible, changes in electrical activity of, upon varying vertical dimension (Manns et al), 438
Myofascial pain-dysfunction syndrome, transcutaneous electrical stimulation as adjunct in management of (Wessberg et al), 307

N

Nasal prostheses, treatment of alar collapse with (Davenport et al), 435
width and incisive papilla as guides for selection and arrangement of maxillary anterior teeth (Mavroskoufis and Ritchie), 592
Natural contours of teeth in metal, reproducing (Lazare), 341
dentition in centric occlusion, intercuspal contacts of (Ehrlich and Taicher), 419
extracted, immediate fixed temporization utilizing (Portera), 286
Nerve supply to aging human gingiva, changes in (Nedelman and Bernick), 364

O

Obturator, hollow-bulb maxillary, repair of (Medford), 111
Occlusal pathosis and associated facial pain, etiology and treatment of (Okeson), 199
seat and marginal seal of full crown preparations, effect of various finish line preparations on (Gavelis et al), 138
Occlusal—*cont'd*
splint, Hawley modified (Rehany and Stern), 536
surfaces of ceramometal restorations, use of silicone index to apply and contour porcelain on (Lubovich and Sanders), 392
vertical dimension, increased, in adult monkeys (Ramfjord and Blankenship), 74
Occlusion, centric, intercuspal contacts of natural dentition in (Ehrlich and Taicher), 419
jaw relations and, Part I: Evaluation of 50 years of reconstructive dentistry (Schweitzer), 383
Oral mucosa, microscopic response of, Part IV: Patient response to variations in denture technique (Sabes et al), 11
Overdenture(s), complete and partial, magnetic retention for (Gillings), 484
patients, two-year longitudinal study of periodontal health status of (Davis et al), 358
treatment, method for reducing undesirable labial undercuts for (Freidline and Wical), 472

P

Pain, associated facial, and occlusal pathosis, etiology and treatment of (Okeson), 199
-dysfunction syndrome, myofascial, transcutaneous electrical stimulation as adjunct in management of (Wessberg et al), 307
maxillofacial, chronic, diagnosis of (Alling), 300
-stress relationship in MPD syndrome patients and non-MPD syndrome patients (Moody et al), 84
Palatal expansion prostheses, adult (Brudvik and Nelson), 315
Pathosis, occlusal, and associated facial pain, etiology and treatment of (Okeson), 199
Patient(s), edentulous, 150, study of articulated jaw records of. Evaluation of cross-bite ridge relations (Sanghvi et al), 24
MPD syndrome, and non-MPD syndrome patients, stress-pain relationship in (Moody et al), 84
non-MPD syndrome, and MPD syndrome patients, stress-pain relationship in (Moody et al), 84
overdenture, two-year longitudinal study of periodontal health status of (Davis et al), 358
prosthodontist, and public (Bishop), 205
partially edentulous, form of mandibular anterior lingual alveolar process in (Pietrokovski and Chapman), 371
response to variations in denture technique. Part IV: Microscopic response of oral mucosa (Sabes et al), 11
who gag with dentures, medical history, social habits, and individual experiences of (Wright), 474
radiologic anatomy of (Wright), 127
Perforated silicone rubber implant, fabrication of (Raval et al), 449
Periodontal health status of overdenture patients, two-year longitudinal study of (Davis et al), 358
Peripheral seal distortion, posterior, related to processing temperature (Firtell et al), 598
Pins, self-shearing retentive, in vitro analysis of (Collard et al), 156
threaded, three new, seating depths of, inserted with contra-angle dental handpiece (Schaefer and Reisbick), 614
Placement, margin, crown contour, and pontic design, current theories of (Becker and Kaldahl), 268
of esthetic veneer crowns. Part I: Anterior tooth visibility (Crispin and Watson), 278
Part II: Posterior tooth visibility (Crispin and Watson), 389
Part III: Attitudes of patients and dentists (Watson and Crispin), 499
Plaque, denture, and denture cleansers (Abelson), 376
Polycarboxylate cement, factors affecting adhesion of, to enamel and dentin (Negm et al), 405

Polyether, polysulfides, and polyvinylsiloxane, Part II: Time-dependent accuracy of elastomer impression materials (Lacy et al), 329
Polysulfides, polyether, and polyvinylsiloxane, Part II: Time-dependent accuracy of elastomer impression materials (Lacy et al), 329
Polyvinylsiloxane, polyether, and polysulfides, Part II: Time-dependent accuracy of elastomer impression materials (Lacy et al), 329
Pontic design, crown contour, and margin placement, current theories of (Becker and Kaldahl), 268
Porcelain on occlusal surfaces of ceramometal restorations, use of silicone index to apply and contour (Lubovich and Sanders), 392
  wear of, when subjected to functional movements of retentive clasp arms, preliminary study of (Maroso et al), 14
Posterior peripheral seal distortion related to processing temperature (Firtell et al), 598
  tooth visibility, Part II: Margin placement of esthetic veneer crowns (Crispin and Watson), 389
  jacket crowns, fractured, repair of, with composite resin (Rehany et al), 455
Preextraction profile record (Crabtree et al), 479
Preparations, full crown, effect of various finish line preparations on marginal seal and occlusal seat of (Gavelis et al), 138
  multiple, intraoral coping technique for making impressions of (Gardner and Loft), 570
  various finish line, effect of, on marginal seal and occlusal seat of full crown preparations (Gavelis et al), 138
Processed acrylic resin and trial bases, validity of maxillomandibular records made with (Langer), 253
Profile record, preextraction (Crabtree et al), 479
Prosthesis(ses), acrylic resin temporary fixed, fabricating for allergic patient (Antonoff and Levine), 678
  adult palatal expansion (Brudvik and Nelson), 315
  nasal, treatment of alar collapse with (Davenport et al), 435
  surgical interim (Frame and King), 108
Prosthetic obturation of surgically acquired maxillary defects, evaluation of speech following (Plank et al), 626
Prosthodontic-endodontic approach to internal tooth reinforcement (Sapone and Lorencki), 164
Prosthodontics, fixed, comparison of elastomeric impression materials used in (Ciesco et al), 89
Prosthodontist, patient, and public (Bishop), 205
Public, patient, and prosthodontist (Bishop), 205

R

Radiographs, dental, mounting for projection or chairside viewing (Tebrock), 456
  transcranial, and serial tomography, comparative evaluation of: Importance of radiography in diagnosis of TMJ dysfunctions (Mongini), 186
Radiography, importance of, in diagnosis of TMJ dysfunctions: Comparative evaluation of transcranial radiographs and serial tomography (Mongini), 186
Radiologic anatomy of patients who gag with dentures (Wright), 127
Radionuclide tracking, computer-monitored, of three-dimensional mandibular movements. Part III: Multiple point sources—Toward mapping of tooth contacts (Salomon et al), 324
Reconstructive dentistry, evaluation of 50 years of. Part I: Jaw relations and occlusion (Schweitzer), 383
  Part II: Effectiveness (Schweitzer), 492
Record(s), functional chew-in, for fixed restorations (Levisman), 676
  initial anatomic plaster, technique for mounting altered cast using (Haller et al) (Tips), 681
  preextraction profile (Crabtree et al), 479
Recording materials, four interocclusal, accuracy and dimensional stability of (Balthazar-Hart et al), 586
Reinforcement, internal tooth, endodontic-prosthodontic approach to (Sapone and Lorencki), 164
Reline, complete denture: Simplified technique (McCartney), 564
Remount cast, fixed partial denture, fabrication of (Tregaskes et al), 334
Remounting removable partial dentures opposing maxillary complete dentures, technique for (Lauciello), 336
Removable partial denture(s), existing, replacing abutment crown for (Garfield), 103
  frameworks, comparative study of centrifugal and vacuum-pressure techniques of casting (Shanley et al), 18
  comparisón of disclosing media used for adjustment of (Dukes and Fields), 380
  swinglock, fabrication of (Schwalm and LaSpina), 216
  opposing maxillary complete dentures, technique for remounting (Lauciello), 336
  swinglock: Where and when (Bolender and Becker), 4
  telescope retainers for (Langer), 37
Resin(s), composite, and amalgam cores, retention of cast crowns cemented to (Hormati and Denehy), 525
  restorations, effect of topical applications of fluoride on (Yaffee and Zalkind), 59
  temporary space maintainers retained with. Part II: Fracture load in vitro (Grajower et al), 49
  various, diametral tensile strengths of (Coury et al), 296
  processed acrylic, and trial bases, validity of maxillomandibular records made with (Langer), 253
Response, patient, to variations in denture technique. Part IV: Microscopic response of oral mucosa (Sabes et al), 11
  microscopic, of oral mucosa, Part IV. Patient response to variations in denture technique (Sabes et al), 11
Restoration(s), ceramometal, use of silicone index to apply and contour procelain on occlusal surfaces of (Lubovich and Sanders), 392
  composite resin, effect of topical application of fluoride on (Yaffe and Zalkind), 59
  effectiveness of glazing (Itoh et al), 606
  of endodontically treated molar with root fracture (Thayer), 415
  fixed, functional chew-in records for (Levisman), 676
  tooth-supported telescope (Langer), 515
Restorative dentistry, potential for tooth fracture in (Braly and Maxwell), 411
Retainers, telescope, for removable partial dentures (Langer), 37
Retention, auxiliary, for complete crowns provided by cement keys (Chan et al), 152
  of cast crowns cemented to amalgam and composite resin cores (Hormati and Denehy), 525
  direct, adjustment of cast clasps for (Stankewitz and Gardner) (Tips), 343
  magnetic, for complete and partial overdentures (Gillings), 484
Retentive pins, self-shearing, in vitro analysis of (Collard et al), 156
Ridge relations, cross-bite, evaluation of. Study of articulated jaw records of 150 edentulous patients (Sanghvi et al), 24
Root fracture, restoration of endodontically treated molar with (Thayer), 415
  movement, vertical, clinical crown lengthening by (Shiloah), 602
Roughness, inner surface, of complete cast crowns made by centrifugal casting machines (Ogura et al), 529
Rubber, implant(s) custom-fabricated silicone, for tissue augmentation—Review (Raval and Schaaf), 432
  perforated silicone, fabrication of (Raval et al), 449

S

Scanning electron microscope study of anorganic mammalian condyles: Condylar cartilage (Lester et al), 422
Seal distortion, posterior peripheral, related to processing temperature (Firtell et al), 598
marginal, and occlusal seat of full crown preparations, effect of various finish line preparations on (Gavelis et al), 138
Seat, occlusal, and marginal seal of full crown preparations, effect of various finish line preparations on (Gavelis et al), 138
Seating depths of three new threaded pins inserted with contra-angle dental handpiece (Schaefer and Reisbick), 614
vertical, of cemented crowns, effect of internal relief, vibration, and venting on (Van Nortwick and Gettleman), 395
Self-shearing retentive pins, in vitro analysis of (Collard et al), 156
SEM and x-ray microanalysis of in vitro corrosion of copper-zinc alloy (Sarkar), 292
Septal defects, simplified method of treating (Gay), 430
Shoulder somatoprosthesis, fabricating (Blumenfeld et al), 542
Silicone(s) (condensation), Part I: Time-dependent accuracy of elastomer impression materials (Lacy et al), 209
index to apply and contour porcelain on occlusal surfaces of ceramometal restoration, use of (Lubovich and Sanders), 392
rubber implant(s), custom-fabricated, for tissue augmentation—Review (Raval and Schaaf), 432
perforated, fabrication of (Raval et al), 449
Social habits, medical history, and individual experiences of patients who gag with dentures (Wright), 474
Somatoprosthesis, shoulder, fabricating (Blumenfeld et al), 542
Solubility, clinical, of luting cements, continued evaluation of (Mitchem and Gronas), 289
Sounds, dental office, decibel ratings of (Kilpatrick), 175
Space maintainers, temporary, retained with composite resin. Part II: Fracture load in vitro (Grajower et al), 49
Special report: Report of Committee on Scientific Investigation of American Academy of Restorative Dentistry (Jendresen et al), 643
Spectacles, moisture chamber, fabricating, with sectional facial moulage (Tautin et al), 183
Speech, evaluation of, following prosthetic obturation of surgically acquired maxillary defects (Plant et al), 626
Splint, modified Hawley occlusal (Rehany and Stern), 536
Stone and epoxy resin dies, linear dimensional accuracy of (Schwartz et al), 621
Strength and repeated firings, effect of, on marginal distortion in two ceramometal systems (Buchanan et al), 502
Stress-pain relationship in MPD syndrome patients and non-MPD syndrome patients (Moody et al), 84
Surgical interim prosthesis (Frame and King), 108
Swinglock removable partial denture(s) framework, fabrication of (Schwalm and LaSpina), 216
Where and when (Bolender and Becker), 4

T

Tarnish, in vitro, of dental amalgams (Vaidyanathan et al), 63
Teeth (tooth) anterior, visibility, Part I: Margin placement of esthetic veneer crowns (Crispin and Watson), 278
artificial, easy method of trimming (Khan) (Tips), 572
contacts, Part III: Multiple point sources—Toward mapping of. Computer-monitored radionuclide tracking of three-dimensional mandibular movements (Salomon et al), 324
fracture in restorative dentistry, potential for (Braly and Maxwell), 411
maxillary anterior, nasal width and incisive papilla as guides for selection and arrangement of (Mavroskoufis and Ritchie), 592
Teeth (tooth)—*cont'd*
posterior, visibility, Part II: Margin placement of esthetic veneer crowns (Crispin and Watson), 389
reinforcement, internal, endodontic-prosthodontic approach to (Sapone and Lorencki), 164
reproducing natural contours of, in metal (Lazare), 341
-supported telescope restorations (Langer), 515
Telescope restorations, tooth-supported (Langer), 515
retainers for removable partial dentures (Langer), 37
Temperature, processing, posterior peripheral seal distortion related to (Firtell et al), 598
Temporization, immediate fixed, utilizing extracted natural dentition (Portera), 286
Tensile strengths, diametral, of various composite resins (Coury et al), 296
Time-dependent accuracy of elastomer impression materials. Part I: (Condensation) silicones (Lacy et al), 209
Tissue augmentation, custom-fabricated silicone rubber implants for—Review (Raval and Schaaf), 432
TMJ dysfunctions, importance of radiography in diagnosis of: Comparative evaluation of transcranial radiographs and serial tomography (Mongini), 186
Tomography, serial, and transcranial radiographs, comparative evaluation of: Importance of radiography in diagnosis of TMJ dysfunctions (Mongini), 186
Topical application of fluoride on composite resin restorations, effect of (Yaffe and Zalkind), 59
Tracking, computer-monitored radionuclide, of three-dimensional mandibular movements. Part III: Multiple point sources—Toward mapping of tooth contacts (Salomon et al), 324
Transcranial radiographs and serial tomography, comparative evaluation of: Importance of radiography in diagnosis of TMJ dysfunctions (Mongini), 186
Transcutaneous electrical stimulation as adjunct in management of myofascial pain-dysfunction syndrome (Wessberg et al), 307
Tray, open-face custom, for edentulous obturator impression (Zaki and Aramany), 639
Trial denture bases, accurately fitting (Berman) (Tips), 573
and processed acrylic resin bases, validity of maxillomandibular records made with (Langer), 253
Trimming artificial teeth, easy method of (Khan) (Tips), 572

U

Undercuts, labial, undesirable, a method for reducing, for overdenture treatment (Freidline and Wical), 472

V

Vacuum-pressure and centrifugal techniques of casting removable partial denture frameworks, comparative study of (Shanley et al), 18
Vegetables and milk in diet of institutionalized elderly people in Finland (Mäkilä), 134
Veneer crowns, esthetic, margin placement of. Part I: Anterior tooth visibility (Crispin and Watson), 278
Part II: Posterior tooth visibility (Crispin and Watson), 389
Part III: Attitudes of patients and dentists (Watson and Crispin), 499
Venting, internal relief, and vibration, effect of, on vertical seating of cemented crowns (Van Nortwick and Gettleman), 395
Vertical dimension, changes in electrical activity of postural muscles of mandible upon varying (Manns et al), 438
occlusal, increased, in adult monkeys (Ramfjord and Blankenship), 74
seating of cemented crowns, effect of internal relief, vibration, and venting on (Van Nortwick and Gettleman), 395

Vibration, internal relief, and venting, effect of, on vertical seating of cemented crowns (Van Nortwick and Gettleman), 395

W

Wear of porcelain when subjected to functional movements of retentive clasp arms, preliminary study of (Maroso et al), 14

Wire clasps, wrought, study of flexibility of (Frank and Nicholls), 259

X

X-ray and SEM microanalysis of in vitro corrosion of copper-zinc alloy (Sarkar), 292

Z

Zinc, copper-, alloy, SEM and x-ray microanalysis of in vitro corrosion of (Sarkar), 292

Subject index

A

Abrasives, aluminous oxide, using, in porcelain-bonded-to-metal fabrication (Winings), 345
Abutment or isolated teeth, strengthening, on removable partial denture master casts (Casey et al), 105
  teeth, clasp-bearing fabricating crowns to fit (Gavelis), 673
    for fixed partial dentures induced by various levels of periodontal support, modification of stresses surrounding: Photoelastic study (Sulik and White), 32
    supporting swinglock removable partial dentures, clinical study of periodontal status of—Pilot study (Gomes et al), 7
Acid-etch canine riser occlusal treatment (Thayer and Duokoudakis), 149
Acrylic resin denture(s), analysis of causes of fracture of (Beyli and von Fraunhofer), 238
    base, allergy to (Tucker), 602
    teeth, custom metal occlusal surfaces for (Schneider), 98
  indexes, stabilized interocclusal centric relation records utilizing (Luebke), 102
  new and old, avoiding demarcation between, when relining or rebasing dentures (Taylor et al) (Tips), 582
Adaptation, marginal, and color stability, Part I: Conventional and microfilled composite resins (Ameye et al), 623
Aid to correct tongue position in mandibular complete denture (Herring and Akerly), 676
Allergy to acrylic resin denture base (Tucker), 602
Alloy(s), removable partial denture, wrought wires, and clasp behavior, Part I: New approach to testing of. Stress-relaxation testing (Morris et al), 133
  restorations, semiprecious and nonprecious, 18-month clinical evaluation of (Landesman et al), 161
  type III gold, complete crowns, cast in phosphate-bonded investment (Cooney and Caputo), 414
  wire, gauges, and lengths, Part III: Influence of, on clasp behavior. Stress-relaxation testing (Brudvik and Morris), 374
Aluminous oxide abrasives, using, in porcelain-bonded-to-metal fabrication (Winings), 345
Alveolar ridge atrophy, residual, bone density and serum minerals in cases of (Mercier and Inoue), 250
  form to enhance esthetics of fixed partial dentures, surgical correction of (Tabita at al), 284
Amalgam, dental, quantitation of colorimetric reaction for determination of gamma-2 phase in (Bowles), 91
  paths, functionally generated, for complete dentures (Shiba et al), 494
  restorations, Class II, influence of proximal retention of fracture strength of (Mondelli et al), 420
    standardized sequence for carving and finishing (Solow), 519
American Board of Prosthodontics (Wendt), 678
Animal studies, Part I. Development of new endosseous dental implant (Weiss and Rostoker), 646
Anterior tooth restorations, inlays for retaining composite resin in (Iglesias), 411
Arch, mandibular, width change evaluation of (Gates and Nicholls), 385
Aspiration or swallowing, of cast restorations, method to prevent (Jacobi and Shillingburg), 642
Atrophy, residual alveolar ridge, bone density and serum minerals in cases of (Mercier and Inoue), 250
Attachment retainers for removable partial dentures, photoelastic analysis of stress patterns on teeth and bone with (Kratochvil et al), 21
Axial grooves, multiple, effect of, on marginal adaptation of full cast-gold crowns (Tjan et al), 399
Axis, mandibular hinge, clinical evaluation of methods used in locating (Razek), 369
  terminal hinge, studies on validity of (Beard and Clayton), 185

B

Bases, crown, bond strength of cements to (Chan et al), 297
  pin-retained composite resin crown, effect of pin depth on dislodgement of (Hermes et al), 293
Bending profiles, microstructures, microhardnesses, and surface characteristics of several wrought wires, comparison of, Part II: Stress-relaxation testing (Morris et al), 256
Bennett movement as recorded by modified pantograph, influence of TMJ dysfunction on. Part I: Literature review (Simonet), 437; Part II: Pilot articulator study (Simonet and Clayton), 545; Part III: Progress report on clinical study (Simonet and Clayton), 652

July, 1-116; August, 117-234; September, 235-356; October, 357-474; November, 475-592; December, 593-714.

Biting strength and food consistency, influences of—Occlusal forces during chewing (Gibbs et al), 561
Bond strength of cements to crowns bases (Chan et al), 297
Bonding of three porcelain repair systems, evaluation of (Nowlin et al), 516
Bone and teeth with attachment retainers for removable partial dentures, photoelastic analysis of stress patterns on (Kratochvil et al), 21
density and serum minerals in cases of residual alveolar ridge atrophy (Mercier and Inoue), 250
Border movements at first molar, chewing movements in relation to (Gibbs et al), 308
Boxing technique for rubber base impressions (Mullick), 461

C

Canals, divergent, nonparallel cast post and core technique for teeth with (Weiner), 290
Cancer patients, head and neck, evaluation of facial prostheses for (Chen et al), 538
Canines, maxillary, esthetic extracoronal retainer for: MGR clasp (McCartney), 490
Carving and finishing amalgam restorations, standardized sequence for (Solow), 519
Cast(s), fixed partial denture working, dowel pin positioning technique for (Robinson and Block), 215
-gold crowns, full, effect of multiple axial grooves on marginal adaptation of (Tjan et al), 399
post and core technique, nonparallel, for teeth with divergent canals (Weiner), 290
removable partial denture master, strengthening abutment or isolated teeth on (Casey et al), 105
restorations, method to prevent swallowing or aspiration of (Jacobi and Shillingburg), 642
Castings in remount procedure, technique for adjustment of (Walker), 263
multiple, remounting, prior to final cementation (Walker), 145
Cavity margins, insertion techniques and adaptation of composite resin to (Azarbal and Denehy), 66
preparation, smear layer removal with chelating agents after (Jodaikin and Austin), 171
Cementation, final, remounting multiple castings prior to (Walker), 145
Cement(s), bond strength of, to crown bases (Chan et al), 297
glass-ionomer, pulpal response to, in primates (Pameijer et al), 36
working qualities of (Reisbick), 525
Centric relation records, stabilized interocclusal, utilizing acrylic resin indexes (Luebke), 102
Ceramometal restorations, effects of opaque and surface texture on color of (Obregon et al), 330
evaluation of marginal integrity of. Part I (Strating et al), 59
maxillary posterior, modified functionally generated path technique for making (Kafandaris), 29
Cervical contours, deficient, gingival tissue response to restoration of, using glass-ionomer material: 12-month report (Garcia et al), 393
Chelating agents, smear layer removal with, after cavity preparation (Jodaikin and Austin), 171
Chewing and swallowing, occlusal forces during, as measured by sound transmission (Gibbs et al), 443
movements, effect of occlusal reconstruction on reproduciblity of (Wood et al), 181
in relation to border movements at first molar (Gibbs et al), 308
occlusal forces during—Influences of biting strength and food consistency (Gibbs et al), 561
Clasp-bearing abutment teeth, fabricating crowns to fit (Gavelis), 673
Clasp—cont'd
behavior, influence of wire alloys, gauges, and lengths on, Part III: Stress-relaxation testing (Brudvik and Morris), 374
removable partial denture alloys, and wrought wires, Part I: New approach to testing of. Stress-relaxation testing (Morris et al), 133
MGR: Esthetic extracoronal retainer for maxillary canines (McCartney), 490
Clench cycles, open-close-, in children, parameters of (Jossell et al), 550
Clinical assessment of wear of two pit and fissure sealants (Jensen et al), 639
Color characterization of provisional restorations (Christensen), 631
of ceramometal restorations, effects of opaque and porcelain surface texture on (Obregon et al), 330
perception, influence of selected light intensities on, within color range of natural teeth (Barna et al), 450
range of natural teeth, influence of selected light intensities on color perception within (Barna et al), 450
stability and marginal adaptation, Part I: Conventional and microfilled composite resins (Ameye et al), 623
Colorimetric reaction for determination of gamma-2 phase in dental amalgam, quantitation of (Bowles), 91
Combined reversible hydrocolloid/irreversible hydrocolloid impression system: Clinical application (Appleby et al), 48
Complement factor C3 and immunoglobulin IgG in inflammatory papillary hyperplasia associated with maxillary dentures, presence of (Eglitis et al), 201
Complete crowns, type III gold alloy, cast in phosphate-bonded investment (Cooney and Caputo), 414
denture(s), functionally generated amalgam paths for (Shiba et al), 494
impression techniques, analysis of development of (Zinner and Sherman), 242
mandibular, aid to correct tongue position in (Herring and Akerly), 676
Composite resin(s) bonded to dental materials (Zalkind et al), 300
conventional and microfilled. Part I: Color stability and marginal adaptation (Ameye et al), 623
crown bases, pin-retained, effect of pin depth on dislodgement of (Hermes et al), 293
inlays for retaining in anterior tooth restorations (Iglesias), 411
inserted over experimental liner, microleakage of: Laboratory study (Hembree), 94
insertion techniques and adaptation of, to cavity margins (Azarbal and Denehy), 66
restorations, well-finished, gingival response to: 28-month report (Blank et al), 157
ultraviolet light–activated, and ultraviolet lights (Murray et al), 167
Conductivity, denture base thermal, effect of, on gustatory response (Kapur and Fischer), 603
Contamination, cross-, avoiding in prosthodontics (Stern and Whitacre), 120
Contours, deficient cervical, gingival tissue response to restoration of, using glass-ionomer material: 12-month report (Garcia et al), 393
Conventional and microfilled composite resins. Part I: Color stability and marginal adaptation (Ameye et al), 623
Cord gingival displacement with gingitage technique, comparison of (Tupac and Neacy), 509
Core pontics, porcelain internal (Choudhary), 458
Cosmetics and removable partial dentures: Class IV partially edentulous patient (Zarb and MacKay), 360
Cranioplasty of difficult frontal region (Firtell and Grisius), 425

Cross-contamination, avoiding in prosthodontics (Stern and Whitacre), 120
Crown(s) bases, bond strength of cements to (Chan et al), 297
pin-retained composite resin, effect of pin depth on dislodgement of (Hermes et al), 293
fabricating, to fit clasp-bearing abutment teeth (Gavelis), 673
full cast-gold, effect of multiple axial grooves on marginal adaptation of (Tjan et al), 399
material, ethylene imine derivative, sensitized tissue response to (Churgin and Payne), 179
type III gold alloy complete, cast in phosphate-bonded investment (Cooney and Caputo), 414
Custom metal occlusal surfaces for acrylic resin denture teeth (Schneider), 98

D

Defects, facial, maxillofacial prosthetic principles in surgical planning for (Parr et al), 323
Dental amalgam, quantitation of colorimetric reaction for determination of gamma-2 phase in (Bowles), 91
implant, new endosseous, development of. Part I: Animal studies (Weiss and Rostoker), 646
materials, composite resin bonded to (Zalkind et al), 300
porcelain, surface finishing of (Sulik and Plekavich), 217
tissues, calcified, staining with food (Chan et al), 175
Dentin permeability: Effects of smear layer removal (Pashley et al), 531
Denture(s), alloys, removable partial, wrought wires, and clasp behavior, Part I: New approach to testing of. Stress-relaxation testing (Morris et al), 133
base, acrylic resin, allergy to (Tucker), 602
resins, 10 commonly used, flexure fatigue of (Johnston et al), 478
thermal conductivity, effect of, on gustatory response (Kapur and Fischer), 603
complete, functionally generated amalgam paths for (Shiba et al), 494
impression techniques, analysis of development of (Zinner and Sherman), 242
mandibular, aid to correct tongue position in (Herring and Akerly), 676
fixed partial, fabricating, using existing restorations (Sarrett), 142
modification of stresses surrounding abutment teeth for, induced by various levels of periodontal support: Photoelastic study (Sulik and White), 32
simplified technique for removal of (Conny and Brown), 505
surgical correction of alveolar ridge form to enhance esthetics of (Tabita et al), 284
working casts, dowel pin positioning technique for (Robinson and Block), 215
maxillary, presence of immunoglobulin IgG and complement factor C3 in inflammatory papillary hyperplasia associated with (Eglitis et al), 210
prong: Combined surgical-prosthetic approach to enhance denture retention (Braun and Leply), 196
removable partial, and cosmetics: Class IV partially edentulous patient (Zarb and MacKay), 360
constructing stable record bases for (Radue and Unger) (Tips), 463
framework, try-in of (Young), 579
master casts, strengthening abutment or isolated teeth on (Casey et al), 105
method to record path of insertion of (Sarnat and Klugman), 222
photoelastic analysis of stress patterns on teeth and bone with attachment retainers for (Kratochvil et al), 21
swinglock, clinical study of periodontal status of abutment teeth supporting—Pilot study (Gomes et al), 7
Denture(s)—cont'd
retention, combined surgical-prosthetic approach to enhance: Prong denture (Braun and Leply), 196
swinglock partial, designing (Becker and Bolender), 126
teeth, acrylic resin, custom metal occlusal surfaces for (Schneider), 98
Design of multiple pontics (Behrend), 634
Dies, removable, positioning dowel pins for (Troendle et al), 575
Dislodgement of pin-retained composite resin crown bases, effect of pin depth on (Hermes et al), 293
Dowel pin(s), positioning for removable dies (Troendle et al), 575
technique for fixed partial denture working casts (Robinson and Block), 215
Dysfunction, TMJ, influence of, on Bennett movement as recorded by modified pantograph. Part I: Literature review (Simonet), 437; Part II: Pilot articulator study (Simonet and Clayton), 545; Part III: Progress report on clinical study (Simonet and Clayton), 652

E

Edentulous impressions, upper, pressures involved in making (Rihani), 610
patient, Class IV partially: Cosmetics and removable partial dentures (Zarb and MacKay), 360
Effect of denture base thermal conductivity on gustatory response (Kapur and Fischer), 603
Electrosurgical incisions, healing of, in gingiva: Early histologic observations in adult men (Kalkwarf et al), 662
Endosseous dental implant, new, development of. Part I: Animal studies (Weiss and Rostoker), 646
Esthetic(s) parameters of mandibular anterior teeth (Lorton and Whitbeck), 280
patient-assisted (Brigante), 14
Ethylene imine derivative transitional crown material, sensitized tissue response to (Churgin and Payne), 179
Extrusion, vertical root, prosthodontic management of (Cronin and Wardle), 498

F

Fabricating crowns to fit clasp-bearing abutment teeth (Gavelis), 673
Facial defects, maxillofacial prosthetic principles in surgical planning for (Parr et al), 323
prosthesis, simplified technique for implanting hair into (Guelde), 341
Faciolingual width before and after tooth restoration: Comparative study (Ehrlich et al), 153
Fatigue, flexure, of 10 commonly used denture base resins (Johnston et al), 478
Finishing and carving amalgam restorations, standardized sequence for (Solow), 519
Fissure and pit sealants, two, clinical assessment of wear of (Jensen et al), 639
Fixed partial denture(s), fabricating, using existing restorations (Sarrett), 142
modification of stresses surrounding abutment teeth for, induced by various levels of periodontal support: Photoelastic study (Sulik and White), 32
simplified technique for removal of (Conny and Brown), 505
surgical correction of alveolar ridge form to enhance esthetics of (Tabita et al), 284
working casts, dowel pin positioning technique for (Robinson and Block), 215
-removable rehabilitation, occlusal analysis for (Murphy and Buhrman), 454
Flexure fatigue of 10 commonly used denture base resins (Johnston et al), 478

Food consistency and biting strength, influences of—Occlusal forces during chewing (Gibbs et al), 561
staining calcified dental tissues with (Chan et al), 175
Fracture of acrylic resin dentures, analysis of causes of (Beyli and von Fraunhofer), 238
strength of Class II amalgam restorations, influence of proximal retention on (Mondelli et al), 420
Full cast-gold crowns, effect of multiple axial grooves on marginal adaptation of (Tjan et al), 399

G

Gamma-2 phase in dental amalgam, quantitation of colorimetric reaction for determination of (Bowles), 91
Gauges, lengths, and wire alloys, Part III: Influence of, on clasp behavior. Stress-relaxation testing (Brudvik and Morris), 374
Gingitage technique, comparison of cord gingival displacement with (Tupac and Neacy), 509
Gingiva, healing of electrosurgical incisions in: Early histologic observations in adult men (Kalkwarf et al), 662
Gingival displacement, cord, with gingitage technique, comparison of (Tupac and Neacy), 509
response to well-finished composite resin restorations: 28-month report (Blank et al), 157
tissue response to restoration of deficient cervical contours using a glass-ionomer material: 12-month report (Garcia et al), 393
Glass-ionomer cement(s), pulpal response to, in primates (Pameijer et al), 36
working qualities of (Reisbick), 525
material, gingival tissue response to restoration of deficient cervical contours using: 12-month report (Garcia et al), 393
Glossal prostheses, maxillary polydimethylsiloxane (Taicher and Bergen), 71
Gold alloy complete crowns, type III, cast in phosphate-bonded investment (Cooney and Caputo), 414
Grooves, multiple axial, effect of, on marginal adaptation of full cast-gold crowns (Tjan et al), 399
Guiding planes: When and where (Holt), 4
Gustatory response, effect of denture base thermal conductivity on (Kapur and Fischer), 603

H

Hair, implanting into facial prosthesis, simplified technique for (Guelde), 341
Healing of electrosurgical incisions in gingiva: Early histologic observations in adult men (Kalkwarf et al), 662
Hinge axis, mandibular, clinical evaluation of methods used in locating (Razek), 369
terminal, studies on validity of (Beard and Clayton), 185
Hydrocolloid, irreversible/reversible hydrocolloid impression system, combined: Clinical application (Appleby et al), 48
reversible/irreversible hydrocolloid impression system, combined: Clinical application (Appleby et al), 48
Hyperplasia, inflammatory papillary, presence of immunoglobulin IgG and complement factor C3 in, associated with maxillary dentures (Eglitis et al), 210

I

Immunoglobulin IgG and complement factor C3 in inflammatory papillary hyperplasia associated with maxillary dentures, presence of (Eglitis et al), 201
Implant, new endosseous dental, development of. Part I: Animal studies (Weiss and Rostoker), 646
Implanting hair into facial prosthesis, simplified technique for (Guelde), 341
Impression(s), edentulous, upper, pressures involved in making (Rihani), 610
Impression(s)—cont'd
rubber base, boxing technique for (Mullick), 461
system, combined reversible hydrocolloid/irreversible hydrocolloid: Clinical application (Appleby et al), 48
techniques, complete denture, analysis of development of (Zinner and Sherman), 242
Incisions, electrosurgical, healing of, in gingiva: Early histologic observations in adult men (Kalkwarf et al), 662
Indexes, acrylic resin, stabilized interocclusal centric relation records utilizing (Luebke), 102
Inflammatory papillary hyperplasia associated with maxillary dentures, presence of immunoglobulin IgG and complement factor C3 in (Eglitis et al), 210
Inlays for retaining composite resin in anterior tooth restorations (Iglesias), 411
Insertion of removable partial denture, method to record path of (Sarnat and Klugman), 222
technique and adaptation of composite resin to cavity margins (Azarbal and Denehy), 66
Integrity, marginal, of ceramometal restorations, evaluation of. Part I (Strating et al), 59
Interocclusal centric relation records, stabilized, utilizing acrylic resin indexes (Luebke), 102
record(s) materials, study of (Mullick et al), 304
self-curing resin and silicone-body, differential accuracy of, and associated weight loss (Millstein and Clark), 380
recording media, simplified method for testing accuracy of (Millstein) (Tips), 107
Investment, phosphate-bonded, type III gold alloy complete crowns cast in (Cooney and Caputo), 414
Irreversible hydrocolloid/reversible hydrocolloid impression system, combined: Clinical application (Appleby et al), 48
Isolated or abutment teeth, strengthening, on removable partial denture master casts (Casey et al), 105

L

Light intensities, selected, influence of, on color perception within color range of natural teeth (Barna et al), 450
Liner, experimental, microleakage of composite resin inserted over: Laboratory study (Hembree), 94

M

Mandibular anterior teeth, esthetic parameters of (Lorton and Whitbeck), 280
arch width change, evaluation of (Gates and Nicholls), 385
complete denture, aid to correct tongue position in (Herring and Akerly), 676
hinge axis, clinical evaluation of methods used in locating (Razek), 369
Marginal adaptation of full cast-gold crowns, effect of multiple axial grooves on (Tjan et al), 399
integrity of ceramometal restorations, evaluation of. Part I (Strating et al), 59
Margins, cavity, insertion technique and adaptation of composite resin to (Azarbal and Denehy), 66
Masseteric silent period duration, effect of voluntary activity on (Bernstein et al), 192
Masticatory ability, comparative investigations of selected methods of evaluating (Krysiński et al), 568
Matrix material, method for making dead soft (Re) (Tips), 224
Maxillary canines, esthetic extracoronal retainer for: MGR clasp (McCartney), 490
dentures, presence of immunoglobulin IgG and complement factor C3 in inflammatory papillary hyperplasia associated with (Eglitis et al), 210
polydimethylsiloxane glossal prostheses (Taicher and Bergen), 71

Maxillary—cont'd
posterior ceramometal restorations, modified functionally generated path technique for making (Kafandaris), 29
Maxillofacial prosthetic principles in surgical planning for facial defects (Parr et al), 323
Metal molds, comparison of three techniques for fabricating (Choy et al), 430
occlusal surfaces, custom, for acrylic resin denture teeth (Schneider), 98
porcelain-bonded-to-, fabrication, using aluminous oxide abrasives in (Winings), 345
Method to prevent swallowing or aspiration of cast restorations (Jacobi and Shillingburg), 642
MGR clasp: Esthetic extracoronal retainer for maxillary canines (McCartney), 490
Microfilled, and conventional, composite resins. Part I: Color stability and marginal adaptation (Ameye et al), 623
Microhardnesses, surface characteristics, bending profiles, and microstructures of several wrought wires, comparison of, Part II: Stress-relaxation testing (Morris et al), 256
Microleakage of composite resin inserted over experimental liner: Laboratory study (Hembree), 94
Microstructures, microhardnesses, surface characteristics, and bending profiles of several wrought wires, comparison of, Part II: Stress-relaxation testing (Morris et al), 256
Minerals, serum, and bone density in cases of residual alveolar ridge atrophy (Mercier and Inoue), 250
Molds, metal, comparison of three techniques for fabricating (Choy et al), 430
Multiple pontics, design of (Behrend), 634

N

Nasal neoplasms, silicone radioactive seed carrier for (Deutch et al), 88
Neoplasms, nasal, silicone radioactive seed carrier for (Deutch et al), 88
Neutral zone, two-dimensional study of, at different occlusal vertical heights (Razek and Abdalla), 484

O

Occlusal analysis for fixed-removable rehabilitation (Murphy and Buhrman), 454
forces during chewing—Influences of biting strength and food consistency (Gibbs et al), 561
and swallowing as measured by sound transmission (Gibbs et al), 443
reconstruction, effect of, on reproducibility of chewing movements (Wood et al), 181
surfaces, custom metal, for acrylic resin denture teeth (Schneider), 98
treatment, acid-etch canine riser (Thayer and Doukoudakis), 149
vertical heights, different, two-dimensional study of neutral zone at (Razek and Abdalla), 484
Occlusion, harmonic, attaining, through visualized strain analysis (Dawson and Arcan), 615
Onlay, pin-retained, restoration of devitalized posterior tooth with (Loeb and Stecz), 408
Opaque and porcelain surface texture, effects of, on color of ceramometal restorations (Obregon et al), 330
Open-close-clench cycles in children, parameters of (Josell et al), 550
Orthodontic tooth movement as adjunct to prosthetic therapy (Tuncay), 41
Osteoporosis, relationship of, to excessive residual ridge resorption (Baxter), 123
Overdenture patient, periodontal considerations in (Robbins), 596

P

Pantograph, modified, influence of TMJ dysfunction on Bennett movement as recorded by. Part I: Literature review (Simonet), 437; Part II: Pilot articulator study (Simonet and Clayton), 545; Part III: Progress report on clinical study (Simonet and Clayton), 652
Pantographic representation of centric relation, effect of different centric relation registrations on (Sindledecker), 271
Path of insertion of removable partial denture, method to record (Sarnat and Klugman), 222
technique, modified functionally generated, for making maxillary posterior ceramometal restorations (Kafandaris), 29
Patient(s)-assisted esthetics (Brigante), 14
head and neck cancer, evaluation of facial prostheses for (Chen et al), 538
Periodontal considerations in overdenture patient (Robbins), 596
status of abutment teeth supporting swinglock removable partial dentures, clinical study of—Pilot study (Gomes et al), 7
support, modification of stresses surrounding abutment teeth for fixed partial dentures induced by various levels of: Photoelastic study (Sulik and White), 32
Permeability, dentin: Effects of smear layer removal (Pashley et al), 531
Pharyngeal portion of speech aid prosthesis, transfer of (Schaaf and Casey), 78
Phosphate-bonded investment, type III gold alloy complete crowns cast in (Cooney and Caputo), 414
Photoelastic analysis of stress patterns on teeth and bone with attachment retainers for removable partial dentures (Kratochvil et al), 21
study: Modification of stresses surrounding abutment teeth for fixed partial dentures induced by various levels of periodontal support (Sulik and White), 32
Pin(s) depth, effect of, on dislodgement of pin-retained composite resin crown bases (Hermes et al), 293
dowel, positioning for removable dies (Troendle et al), 575
technique for fixed partial denture working casts (Robinson and Block), 215
—retained composite resin crown bases, effect of pin depth on dislodgement of (Hermes et al), 293
onlay, restoration of devitalized posterior tooth with (Loeb and Stecz), 408
Pit and fissure sealants, two, clinical assessment of wear of (Jensen et al), 639
Planes, guiding: When and where (Holt), 4
Polydimethylsiloxane glossal prostheses, maxillary (Taicher and Bergen), 71
Pontic(s), multiple, design of (Behrend), 634
porcelain internal core (Choudhary), 458
Porcelain-bonded-to-metal fabrication, using aluminous oxide abrasives in (Winings), 345
dental, surface finishing of (Sulik and Plekavich), 217
internal core pontics (Choudhary), 458
repair systems, three, evaluation of bonding of (Nowlin et al), 516
surface texture and opaque, effects of, on color of ceramometal restorations (Obregon et al), 330
Position, tongue, aid to correct, in mandibular complete denture (Herring and Akerly), 676
Post, cast, and core technique, nonparellel, for teeth with divergent canals (Weiner), 290
Posterior tooth, tilted. Part I: Etiology, syndrome, and prevention (Stern et al), 404
Pressures involved in making upper edentulous impressions (Rihani), 610
Prevention, etiology, and syndrome, Part I: Tilted posterior tooth (Stern et al), 404

Primates, pulpal response to glass-ionomer cement in (Pameijer et al), 36
Prong denture: Combined surgical-prosthetic approach to enhance denture retention (Braun and Leply), 196
Prosthesis(es), facial, for head and neck cancer patients, evaluation of (Chen et al), 538
simplified technique for implanting hair into (Guelde), 341
maxillary polydimethylsiloxane glossal (Taicher and Bergen), 71
speech aid, transfer of pharyngeal portion of (Schaaf and Casey), 78
Prosthetic principles, macillofacial, in surgical planning for facial defects (Parr et al), 323
therapy, orthodontic tooth movement as adjunct to (Tuncay), 41
Prosthodontic(s), avoiding cross-contamination in (Stern and Whitacre), 120
management of vertical root extrusion (Cronin and Wardle), 498
Provisional restorations, color characterization of (Christensen), 631
Proximal retention, influence of, on fracture strength of Class II amalgam restorations (Mondelli et al), 420
Pulpal response to glass-ionomer cement in primates (Pameijer et al), 36

R

Radioactive seed carrier, silicone, for nasal neoplasms (Deutch et al), 88
Reconstruction, occlusal, effect of, on reproducibility of chewing movements (Wood et al), 181
Record(s) bases, stable, constructing, for removable partial dentures (Radue and Unger) (Tips), 463
materials, interocclusal, study of (Mullick et al), 304
silicone-body and self-curing resin interocclusal, differential accuracy of, and associated weight loss (Millstein and Clark), 380
stabilized interocclusal centric relation, utilizing acrylic resin indexes (Luebke), 102
Recording media, interocclusal, simplified method for testing accuracy of (Millstein) (Tips), 107
Registrations, different centric relation, effect of, on pantographic representation of centric relation (Sindledecker), 271
Rehabilitation, fixed-removable, occlusal analysis for (Murphy and Buhrman), 454
Remount procedure, technique for adjustment of castings in (Walker), 263
Removable dies, positioning dowel pins for (Troendle et al), 575
partial denture(s) alloys, wrought wires, and clasp behavior, Part I: New approach to testing of. Stress-relaxation testing (Morris et al), 133
and cosmetics: Class IV partially edentulous patient (Zarb and MacKay), 360
constructing stable record bases for (Radue and Unger) (Tips), 463
framework, try-in of (Young), 579
master casts, strengthening abutment or isolated teeth on (Casey et al), 105
method to record path of insertion of (Sarnat and Klugman), 222
photoelastic analysis of stress patterns on teeth and bone with attachment retainers for (Kratochvil et al), 21
swinglock, clinical study of periodontal status of abutment teeth supporting—Pilot study (Gomes et al), 7
Repair systems, three porcelain, evaluation of bonding of (Nowlin et al), 516
Reproducibility of chewing movements, effect of occlusal reconstruction on (Wood et al), 181
Residual alveolar ridge atrophy, bone density and serum minerals in cases of (Mercier and Inoue), 250
ridge resorption, excessive, relationship of osteoporosis to (Baxter), 123
Resin(s), acrylic, denture(s), analysis of causes of fractures of (Beyli and von Fraunhofer), 238
teeth, custom metal occlusal surfaces for (Schneider), 98
indexes, stabilized interocclusal centric relation records utilizing (Luebke), 102
composite, bonded to dental materials (Zalkind et al), 300
conventional and microfilled. Part I: Color stability and marginal adaptation (Ameye et al), 623
crown bases, pin-retained, effect of pin depth on dislodgement of (Hermes et al), 293
inlays for retaining in anterior tooth restorations (Iglesias), 411
inserted over experimental liner, microleakage of: Laboratory study (Hembree), 94
insertion techniques and adaptation of, to cavity margins (Azarbal and Denehy), 66
restorations, well-finished, gingival response to: 28-month report (Blank et al), 157
ultraviolet light-activated and ultraviolet lights (Murray et al), 167
denture base, acrylic, allergy to (Tucker), 602
10 commonly used denture base, flexure fatigue of (Johnston et al), 478
Resorption, excessive residual ridge, relationship of osteoporosis to (Baxter), 123
Restoration(s), amalgam, standardized sequence for carving and finishing (Solow), 519
anterior tooth, inlays for retaining composite resin in (Iglesias), 411
cast, method to prevent swallowing or aspiration of (Jacobi and Shillingburg), 642
ceramometal, effects of opaque and porcelain surface texture on color of (Obregon et al), 330
evaluation of marginal integrity of. Part I (Strating et al), 59
Class II amalgam, influence of proximal retention on fracture strength of (Mondelli et al), 420
existing, fabricating fixed partial dentures using (Sarrett), 142
maxillary posterior ceramometal, modified functionally generated path technique for making (Kafandaris), 29
of deficient cevical contours using glass-ionomer material, gingival response to: 12-month report (Garcia et al), 393
devitalized posterior tooth with pin-retained onlay (Loeb and Stecz), 408
provisional, color characterization of (Christensen), 631
semiprecious and nonprecious alloy, 18-month clinical evaluation of (Landesman et al), 161
tooth, faciolingual width before and after: Comparative study (Ehrlich et al), 153
well-finished composite resin, gingival response to: 28-month report (Blank et al), 157
Retainer(s), attachment, for removable partial dentures, photoelastic analysis of stress patterns on teeth and bone with (Kratochvil et al), 21
esthetic extracoronal, for maxillary canines: MGR clasp (McCartney), 490
Retention, denture, combined surgical-prosthetic approach to enhance: Prong denture (Braun and Lepley), 196
proximal, influence of, on fracture strength of Class II amalgam restorations (Mondelli et al), 420
Reversible hydrocolloid/irreversible hydrocolloid impression system, combined: Clinical application (Appleby et al), 48

Ridge form, alveolar, to enhance esthetics of fixed partial dentures, surgical correction of (Tabita et al), 284
resorption, excessive residual, relationship of osteoporosis to (Baxter), 123
Root extrusion, vertical, prosthodontic management of (Cronin and Wardle), 498
Rubber base impressions, boxing technique for (Mullick), 461

S

Sealants, pit and fissure, two, clinical assessment of wear of (Jensen et al), 639
Seed carrier, silicone radioactive, for nasal neoplasms (Deutch et al), 88
Self-curing resin and silicone-body interocclusal records, differential accuracy of, and associated weight loss (Millstein and Clark), 380
Serum minerals and bone density in cases of residual alveolar ridge atrophy (Mercier and Inoue), 250
Silent period duration, masseteric, effect of voluntary activity on (Bernstein et al), 192
Silicone-body and self-curing resin interocclusal records, differential accuracy of, and associated weight loss (Millstein and Clark), 380
radioactive seed carrier for nasal neoplasms (Deutch et al), 88
Smear layer removal, effects of: Dentin permeability (Pashley et al), 531
Staining calcified dental tissues with food (Chan et al), 175
Stability, color, and marginal adaptation, Part I: Conventional and microfilled composite resins (Ameye et al), 623
Speech aid prosthesis, transfer of pharyngeal portion of (Schaaf and Casey), 78
Sound transmission, occlusal forces during chewing and swallowing as measured by (Gibbs et al), 443
with chelating agents after cavity preparation (Jodaiken and Austin), 171
Strain analysis, visualized, attaining harmonic occlusion through (Dawson and Arcan), 615
Strength, fracture, of Class II amalgam restorations, influence of proximal retention on (Mondelli et al), 420
Stress(es) patterns on teeth and bone with attachment retainers for removable partial dentures, photoelastic analysis of (Kratochvil et al), 21
-relaxation testing. Part I: New approach to testing of removable partial denture alloys, wrought wires, and clasp behavior (Morris et al), 133
II: Comparison of bending profiles, microstructures, microhardnesses, and surface characteristics of several wrought wires (Morris et al), 256
III: Influence of wire alloys, gauges, and lengths on clasp behavior (Brudvik and Morris), 374
surrounding abutment teeth for fixed partial dentures induced by various levels of periodontal support, modification of: Photoelastic study (Sulik and White), 32
Surface characteristics, bending profiles, microstructures, and microhardnesses of several wrought wires, comparison of, Part II: Stress-relaxation testing (Morris et al), 256
finishing of dental porcelain (Sulik and Plekavich), 217
texture, porcelain, and opaque, effects of, on color of ceramometal restorations (Obregon et al), 330
Surgical planning for facial defects, maxillofacial prosthetic principles in (Parr et al), 323
Swallowing and chewing, occlusal forces during, as measured by sound transmission (Gibbs et al), 443
or aspiration, method to prevent, of cast restorations (Jacobi and Shillingburg), 642
Swinglock partial dentures, designing (Becker and Bolender), 126
removable partial dentures, clinical study of periodontal status of abutment teeth supporting—Pilot study (Gomes et al), 7

T

Terminal hinge axis, studies on validity of (Beard and Clayton), 185
Texture, porcelain surface, and opaque, effects of, on color of ceramometal restorations (Obregon et al), 330
Thermal conductivity, denture base, effect of, on gustatory response (Kapur and Fischer), 603
Tilted posterior tooth. Part I: Etiology, syndrome, and prevention (Stern et al), 404
Tissue(s), calcified dental, staining with food (Chan et al), 175
conditioning material, aid to removing (Fowler) (Tips), 581
gingival, response to restoration of deficient cervical contours using a glass-ionomer material: 12-month report (Garcia et al), 393
response, sensitized, to ethylene imine derivative transitional crown material (Churgin and Payne), 179
TMJ dysfunction, influence of, on Bennett movement as recorded by modified pantograph. Part I: Literature review (Simonet), 437; Part II: Pilot articulator study (Simonet and Clayton), 545; Part III: Progress report on clinical study (Simonet and Clayton), 652
Tongue position, aid to correct, in mandibular complete denture (Herring and Akerly), 676
Tooth (teeth), abutment, clasp-bearing, fabricating crowns to fit (Gavelis), 673
for fixed partial dentures induced by various levels of periodontal support, modification of stresses surrounding: Photoelastic study (Sulik and White), 32
or isolated, strengthening, on removable partial denture master casts (Casey et al), 105
supporting swinglock removable partial dentures, clinical study of periodontal status of—Pilot study (Gomes et al), 7
acrylic resin denture, custom metal occlusal surfaces for (Schneider), 98
and bone with attachment retainers for removable partial dentures, photoelastic analysis of stress patterns on (Kratochvil et al), 21
devitalized posterior, restoration of with pin-retained onlay (Loeb and Stecz), 408
mandibular anterior, esthetic parameters of (Lorton and Whitbeck), 280
movement, orthodontic, as adjunct to prosthetic therapy (Tuncay), 41
natural, influence of selected light intensities on color perception within color range of (Barna et al), 450
restoration(s), anterior, inlays for retaining composite resin in (Iglesias), 411
faciolingual width before and after: Comparative study (Ehrlich et al), 153
tilted posterior. Part I: Etiology, syndrome, and prevention (Stern et al), 404
with divergent canals, nonparallel cast post and core technique for (Weiner), 290
Try-in of removable partial denture framework (Young), 579

U

Ultraviolet light(s)-activated composite resins and ultraviolet lights (Murray et al), 167
and ultraviolet light-activated composite resins (Murray et al), 167
Upper edentulous impressions, pressures involved in making (Rihani), 610

V

Vertical heights, different occlusal, two-dimensional study of neutral zone at (Razek and Abdalla), 484
root extrusion, prosthodontic management of (Cronin and Wardle), 498

W

Wear, clinical assessment of, of two pit and fissure sealants (Jensen et al), 639

Width change, mandibular arch, evaluation of (Gates and Nicholls), 385

Wire(s) alloys, gauges, and lengths, Part III: Influence of, on clasp behavior. Stress-relaxation testing (Brudvik and Morris), 374

Wire(s)—cont'd

several wrought, comparison of bending profiles, microstructures, microhardnesses, and surface characteristics of, Part II: Stress-relaxation testing (Morris et al), 256

wrought clasp behavior, and removable partial denture alloys, Part I: New approach to testing of. Stress-relaxation testing (Morris et al), 133
